

Gray Davis, Governor

STATE CLEARINGHOUSE

NEWSLETTER

October 1 through 15, 2001

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **October 1 through 15, 2001**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html#clearinghouse

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte Joung and Karen Fowler (for projects in Northern California)
Scott Morgan and Brian Grattidge (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Consider long-term energy conservation measures. Payback analysis may now be more reasonable.

CEQA & Planning Case Law

Summary of Recent CEQA & Planning Case Law

The following are summaries of recent court cases relating to the California Environmental Quality Act and/or land use planning law.

Planning Cases

Case Name (No.):	Gardner v. County of Sonoma (A093139)
Court, Filing Date:	Cal. App. 1 st /1, 10/11/2001
Source:	2001 Daily Journal D.A.R. 10909
Summary of Ruling:	Appellants argued that antiquated subdivision maps can create legal parcels for subdivisions despite their noncompliance with the Subdivision Map Act or any of its precursors. The court decided that antiquated maps created before 1893 do not create legal parcels.

Please be advised, the information contained in these summaries does not constitute legal advice, nor should the summaries be relied upon as a matter of law. Refer to the full text of the cases cited for the complete ruling and case facts.

Federal Notices

Intergovernmental Review Notices (October 1st – 15th, 2001)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

Agency:	Federal Energy Regulatory Commission
Contact:	N/A
Telephone:	N/A
E-mail:	N/A
Address:	888 First St. N.E., Room 1A, Washington D.C. 20426
Description:	On August 6, 2001, the Commission held a public meeting regarding the El Dorado Project (No. 184-065). The El Dorado Irrigation District, the U.S. Forest Service, and other interested parties attended to discuss alternatives for completing the relicensing proceeding for the project.

<u>Documents Received on Monday, October 01, 2001</u>			
2001102006	Use Permit Application No. 2001-17 - Jason Wright Stanislaus County Modesto--Stanislaus Request to change a non-conforming use to allow a custom motorcycle parts/sales business on .73+ acres in the A-20-40 (General Agriculture) zoning district.	CON	10/12/2001
2001081117	Nursery Products Adelanto, City of Adelanto--San Bernardino The proposed project consists of entitlements for the construction and operation of a composting recycling center for green wastes and bio-solids. Bio-solids are digested, de-watered sewage sludge from municipal water reclamation facilities throughout southern California, including bio-solids from the City of Adelanto's municipal water reclamation facility. Green waste is spent wood, branches, trees, grass and other organic wood wastes. Both the green waste and bio-solids will be trucked into the Nursery Products facility Monday through Friday. The clean wood or green wastes is pre-processed using a Morbark 1300 tub grinder. The bio-solids are tipped from the end dump truck directly onto the mixing platform. Using a front-end loader shovel, the bio-solids are mixed with wood/green waste at a ratio of 50% bio-solids to 50% wood green waste. Using the same loading shovel the mixed wastes are constructed into windrows of eight to twelve feet in height. A proprietary catalyst is then added using the front-end shovel. The microorganisms within the catalyst will migrate along the windrow surface very rapidly and proceed to penetrate in time into the core of the pile. The windrow remains untouched for approximately 4-5 weeks. There is no physical movement of the pile. The microorganisms do all of the work. Conventional composting requires that the windrows be frequently turned to aerate to add oxygen. That will not be the case at the Nursery Products facility.	EIR	11/14/2001
2001092106	Davis Oaks Apartment Project Stockton, City of Stockton--San Joaquin Davis Oaks Apartment Project (IS23-01) - Request for a Use Permit to allow the construction and operation of an 80-unit apartment complex located west of Davis Road between South Bear Creek and Thornton Road. 2001101023	Cry S2001-09 Big Bear Municipal Water District --San Bernardino The proposed project is to dredge two sites in Big Bear Lake adjacent to 39195 Seminole Street, Fawnskin. The contractor will dredge two acres, the first area measures 203' in length, 40' wide and 6' deep for a total of 1,800 cubic yards of material to be removed. This part of the project will improve navigational access and assist in reducing the aquatic weed growth in the area. The second project area measuring 175' in length, 35' wide and 6' deep for a total of 1,361 cubic yards of material to be removed. The project will require the use of excavators and dump trucks to dredge and remove the material from the project site. At the present time, the proposed project areas are dry due to lower Lake levels and the contractor will use the materials removed from the Lake at another job location.	Neg	10/30/2001

	accurate definition of the landfill and its operation, including the addition of 0.5 acres adjacent to Cell 2-3, ensure that the landfill and its operation is in compliance with applicable federal and state regulations, and ensure that there are adequate provisions to reasonably modify the landfill and its operations to satisfy evolving regulations and community needs.		
2001104002	Camp Roberts Integrated Natural Resources Management Plan (NRMP) California Army National Guard --San Joaquin, Monterey Under the proposed action, the California Army National Guard (CA ARNG) would implement an Integrated Natural Resources Management Plan (INRMP) at Camp Roberts, California. The INRMP, which is required by the Sikes Act (USC 670A et seq., as amended) and Army Regulation (AR) 200-3, emphasizes ecosystem management with the military mission (i.e., training and site development) in a manner consistent with environmental requirements, the plan would prevent unnecessary natural resources damage and avoid regulatory conflicts, thus ensuring long-term sustainability of military training lands. Because ecosystems extend beyond the training site's boundary, the plan also emphasizes partnerships with adjoining property owners and outside stakeholders with interest in natural resources damage and avoid regulatory conflicts, thus ensuring long-term sustainability of military training lands. Because ecosystems extend beyond the training site's boundary, the plan also emphasizes partnerships with adjoining property owners and outside stakeholders with interest in natural resources management. The period of the INRMP would be five years (federal fiscal years 2002 to 2006), with yearly updates as needed.	Neg	10/31/2001

2001108079	Berry Summit Sand Storage Facility Caltrans #1 --Humboldt The California Department of Transportation (Caltrans) proposes to construct a 298 m2 storage building at the southeast corner of the intersection of State Route 299 and Titlow Hill Road in Humboldt County. The project location is approximately 15.7 kilometers west of Willow Creek, and approximately 46.8 kilometers east of Arcata. Construction of the new sand storage building would include an asphalt concrete access road from Titlow Hill Road, culvert installation, site grading and paving, perimeter fencing, extension of utilities, drainage improvements, including sand traps, and landscaping. The purpose of the project is to provide a new sand storage facility due to deficiencies of the current facility located at KP 54.8.	NOE	
2001108080	Berry Summit Sand Storage Facility Caltrans #1 --Humboldt The California Department of Transportation (Caltrans) proposes to construct a 298 m2 sand storage building at the southeast corner of the intersection of State Route 299 and Titlow Hill Road in Humboldt County. The project location is approximately 15.7 kilometers west of Willow Creek, and approximately 46.8 kilometers east of Arcata. Construction of the new sand storage building would include an asphalt concrete access road from Titlow Hill Road, culvert installation, site grading and paving, perimeter fencing, extension of utilities, drainage improvements, including sand traps, and landscaping. The purpose of the project is to provide a new sand storage facility due to deficiencies of the current facility located at KP 54.8.	NOE	
2001108081	Remove Vegetative Debris and Growing Vegetation Caltrans #2 --Tehama To remove vegetative debris and growing vegetation in the channel bottoms of six creeks in Tehama County.	NOE

2000101063	Chandler's Palos Verdes Sand and Gravel Co. Inc. Surface Mining Permit No. 202 Riverside County Transportation & Land Management Agency --Riverside The proposed project is the expansion of an existing sand and gravel surface mine and related aggregates processing facility. The project site is 215 acres in size. The existing permit was approved in January 1976, and will expire in 2008. The expansion proposes to add approximately 50 acres to the 121 acres currently approved for excavation, and to extend the life of the mine by 27 years. Additionally, the project proposes to recycle inert construction waste and revise the reclamation plan to incorporate groundwater recharge. The project is proposed to be implemented over approximately 35 years (including the requested 27 year extension). The project proposes a 5,900 square foot metal shop building. Concurrently, the applicant has submitted an application to amend the Riverside County comprehensive General Plan and to change the zone of a 17.7-acre portion of the property to be consistent with the General Plan designation and the zoning on the balance of the property, and with the proposed use. Neg	11/01/2001
2000101048	San Diego Office Building Replacement - Department of Transportation District 11 Caltrans #11 San Diego--San Diego The proposed project will consist of development of a consolidated office facility that will have approximately 301,000 gross square feet of new office space, house 956 Caltrans employees, and provide 815 parking spaces on 11 acres. The proposed facility will consolidate existing Caltrans functions currently found at several locations in the project vicinity. Approximately 860 employees are currently located at the existing facility immediately southeast of Taylor Street on Juan Street in the community of Old Town. The new complex will consist of three office buildings, a central plant building, and a vehicle light maintenance facility. The three buildings will range from two to five stories in height. The project also incorporates landscaping and outdoor plaza areas.	NOD	
2001042128	Parkway Plaza Neighborhood Park 9C #LS96 Sacramento, City of Sacramento--Sacramento The proposed project involves the construction of a 5 acre neighborhood park consisting of tennis courts, a basketball court, turf volleyball court, group picnic area with shade structure, adventure play area, tot play area, grassy play area, bicycle rest area, and other amenities including a portable restroom, security lighting, sports lighting, walkway, drinking fountain, picnic tables and benches, and a moss rock garden.	NOD	
2001072077	Sacramento Regional County Sanitation District Biosolids Management System Project Sacramento County Elk Grove--Sacramento The Biosolids Management System consists of two elements: 1) lining as many as four of the five existing DLD units, and 2) construction and operation of a Biosolids Recycling Facility. The purpose of the BRF is to provide a reliable and safe mechanism for allowing beneficial use of biosolids generated at the SRWTP. The two elements comprise a coordinated system for biosolids management in that all biosolids that are not conveyed to the BRF for recycling would be conveyed to the lined DLDs for disposal. The number of DLDs to be lined would depend on the capacity of the BRF; biosolids that could not be accommodated at the BRF would be land-disposed.	NOD

	match existing appearance.		
2001108097	<p>Replace Water System Parks and Recreation, Department of --San Mateo</p> <p>Replace all water lines at Half Moon Bay State Beach from source (city water connection) to connection point at lateral systems (buildings, restrooms, irrigation hubs, etc.). All trenching will take place in previously disturbed areas, within the general footprint of existing roads, campground, and parking areas. Disturbed areas of roads and parking areas/spurs will be reasphalted; other areas impacted by trenching will be revegetated with native plants.</p>	NOE	
2001108098	<p>Sewer System Repairs Parks and Recreation, Department of --Butte</p> <p>Repair/replace portions of the sewer pump stations at Lake Oroville State Recreation Area - Kelly Ridge/Bidwell Canyon to maintain reliable operation. No ground-disturbing activities are anticipated.</p>	NOE	
2001108099	<p>Replace Combo Building - Loafer Creek Parks and Recreation, Department of --Butte</p> <p>Replace existing non-accessible shower complex (3 buildings) at Lake Oroville State Recreation Area- Loafer Creek to provide improved services and ADA access. New complex will consist of two buildings, each with unisex, ADA-accessible shower units. Walkways near existing buildings will be removed and areas regraded to provide accessible paths to parking stalls and camping sites. Existing propane tank will be replaced with a smaller tank at the same location. New structures will overlap existing footprints, but will be slightly larger, due to ADA and building code requirements and different layout. Location of buildings may require the construction of 6"-24" high retaining walls to stabilize the slope. New buildings will be connected to existing utility service (electric, water, sewer system, and propane lines). Trenches for both utility connections and building footings will be 2 feet deep and approximately 12" wide, and will occur within the footprint of the existing buildings or adjacent, previously disturbed areas. Construction will require the removal of a limited number of blue oaks (none exceeding 24" in diameter), the removal of which will not significantly impact the surrounding canopy.</p>	NOE	
2001108100	<p>Monterey District - Install Fire Sprinklers Parks and Recreation, Department of --Monterey</p> <p>The purpose of the project is to install a fire sprinkler in the Monterey District's maintenance building from the Garden Road area. Almost all of the trenching for the fire sprinkler water line will be in the pavement area of the parking lot to avoid impacts to trees and endangered orchids. The small area of the water line near the water meter that is not paved will be hand-dug to avoid impacts to shrubs and tree roots. All excavation material will be kept on the pavement.</p>	NOE

2001101038	Special Use Permit No. PSP 01-084 (ZA) Tulare County Resource Management Agency Visalia--Tulare Expansion of an existing recycling facility to include installation of new recycling technologies to increase recycling rate, construction of perimeter fencing in excess of height limitations, yard areas and setbacks, increase building square footage for expanded operation, including number of total employees from 70 to 90, increase processing amounts to 1,200 tons per day, increase traffic to 824 trips per day, and increase hours of operation to 24 hours per day, 7 days per week.	CON	11/02/2001
2000122027	Vineyard Springs Estates Nevada County --Nevada Tentative Parcel Map Application proposing to divide 30 acres into four parcels of 3.78, 4.00, 11.0 and 11.22 acres. The project includes the construction of three ponds of .86, 1.0 and 1.01 acres and a "Petition for Exception" to through access road requirements.	EIR	11/19/2001
2001041082	Heart of the City EIR (IES 00-11) Redondo Beach, City of Redondo Beach--Los Angeles The project is a revitalization program for 150 acres of the City's harbor area. Re-use and reconfiguration of existing industrial lands (AES power generating plant), and commercial areas into commercial and residential areas are anticipated. Creation of a new redevelopment project area, revision of the local coastal plan, and entitlement of certain private development proposals are part of the environmental clearance for this project.	EIR	11/19/2001
2001104003	Camp San Luis Obispo Integrated Natural Resources Management Plan California Army National Guard San Luis Obispo--San Luis Obispo Under the proposed action, the California Army National Guard would implement an Integrated Natural Resources Management Plan (INRMP) at Camp San Luis Obispo, California. The INRMP, which is required by the Sikes Act and Army Regulation (AR) 200-3, emphasizes ecosystem management rather than the traditional management of individual species or individual components. Using this approach, the plan would integrate ecosystem management with the military mission in a manner consistent with environmental laws and regulations, including protection of listed threatened and endangered species. By integrating military mission and environmental requirements, the plan would prevent unnecessary natural resources damage and avoid regulatory conflicts, thus ensuring long-term sustainability of military training lands. Because ecosystems extend beyond the training site's boundary, the plan also emphasizes partnerships with adjoining property owners and outside stakeholders with interest in natural resource management. The period of the INRMP would be five years (federal fiscal years 2002-2006), with yearly updates as needed.	JD	11/02/2001

2001102028	Penryn County Estates (EIAQ-3568) Placer County Planning Department --Placer Proposal to create 15 rural residential lots on 41.2 acres. Lot sizes proposed range from 2.3 to 3 acres in size.	Neg	11/02/2001
2001102029	Crowley Creek Subdivision Shasta County --Shasta The proposal is to create a 14 lot subdivision with a 22.49 acre remainder parcel. The lots will range from approximately 1/3 acre to one acre in size. Development of the site will require minimal grading and vegetation removal because the site has been extensively tilled and graded in the past. The lots will be developed with individual single family dwellings typically featuring a house with an attached garage with landscaped front and rear yard areas. In some cases the future owners may construct residential accessory buildings such as garden sheds or hobby shops. The main access road will cross Crowley Creek, a tributary to Cottonwood Creek via a new bridge or culvert. The secondary access is planned to utilize two existing bridges. An alternative secondary access via a loop road system would require construction of new bridges. Drainage from the site will be collected in a detention basin located between lots 1 and 2. The run-off from the site will be released into Crowley Creek after high water flows. The detention pond will also serve as a sediment basin.	Neg	11/02/2001
1998052058	Decker Island Habitat Development Water Resources, Department of Antioch--Sacramento, Solano, Contra Costa The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number R2-2001-449 pursuant to Section 1601 of the Fish and Game Code to the project applicant, California Department of Water Resources. The work that will be completed under the agreement will involve the breaching of the "east" channel entrance near the northeast tip of Decker Island. Related activities include excavation, clearing of invasive non-native vegetation, and armoring of the entrance to protect against erosion. This will allow inundation of tidal channels within a 15 acre fish and wildlife habitat area. The project area was expanded from 10 acres to 15 acres via an April, 2000 addendum.	NOD

2000101072	<p>Cal Poly Master Plan California State Polytechnic University, San Luis Obispo San Luis Obispo--San Luis Obispo</p> <p>At Site One, the project will replace a 24-inch metal culvert with an arch culvert, seven feet wide, three feet high, and 50 to 60 feet long. At site two, the bank slope will be restructured and rock slope protection boulders will be placed at the upstream edge of the restructured points to dissipate the water's force and to protect banks. The California Department of Fish and Game is executing Lake and Streambed Alteration Agreement Number R3-2001-0461 pursuant to Section 1601 of the Fish and Game Code to the project operator, Mike Hall, Animal Science Department.</p>	NOD	
2001071027	<p>Lambert Animal Rehabilitation Facility San Diego County, Department of Planning and Land Use --San Diego</p> <p>The project is for a Minor Use Permit that proposes to expand and utilize the existing animal rehabilitation facilities to continue the operation of an animal rescue center for injured native, wild species. The project is located on 2.77 acres with an existing single family residence, one agricultural employee residential unit and animal rehabilitation enclosures located among the existing shrub and boulders. The site has a land use regulation of A70, limited agriculture and a neighborhood regulation of "L". Such a regulation allows for a maximum of 25 specialty animals on site by right. The regulation requires a Minor Use Permit for facilities dealing with more than 25 specialty animals. The project proposes a Minor Use Permit for the rehabilitation of more than 25 animals on site.</p>	NOD	
2001071098	<p>Johnson Engineer Springs Verizon Cell Site San Diego County, Department of Planning and Land Use --San Diego</p> <p>The project proposes an unmanned telecommunications facility on a portion of a 40-acre lot. The project includes 8 antennas comprising of 2 sectors. Both sectors will include one-foot by four-foot low-profile panel antennas mounted on four-inch diameter six foot tall steel poles. A digital dish, four feet in diameter, is proposed for system interconnection. Also included is a 12-foot by 24-foot by 10-foot radio equipment shelter.</p>	NOD	
2001081115	<p>James Office Building San Diego County Department of Planning and Land Use --San Diego</p> <p>The project proposes a two-story office building, approximately 15,200 square feet in size and 28 feet in height with parking for 76 vehicles on three parcels of 1.256 acres. Two driveways will provide access to the site, one accessed from Alpine Boulevard and the other from Rock Terrace Road.</p>	NOD

A concrete lined sand trap-max. depth of 2.5' adjacent to SE corner of the pavement described above.	NOE	
2001108122	Methodology to Assess Air Quality Impacts of Distributed and Backup Generation Energy Commission Riverside--Riverside The present California power crisis is creating an urgent need to look for ways to produce significant amounts of electricity in the near term. Conservation and possibly the use of distributed generation (DG), including existing little-used backup generators (BUGs), is under active consideration as a possible short-term solution for mitigating the number and extent of shortages. The use of BUGs or any or form of distributed generation is feasible only if it is possible to avoid potentially significant adverse environmental impacts. Existing diesel BUGs have almost no modern emission controls and can be the source of significant amounts of particulate matter and nitrogen oxides. The purpose of this project is to develop the methodologies to evaluate the air quality impacts of DG by using the existing population of diesel BUGs as a surrogate representation. In particular, provide quantifiable, objective data for decision-makers concerning the potential: (1) air quality impacts of the use of significant numbers of BUGs, (2) mitigating likely air quality impacts associated with the use of large numbers of BUGs, (3) the costs and logistics of bringing these units into operation in a short time frame, (4) ways to effectively dispatch the use of these units to address electricity demands and environmental concerns, (5) regulatory constraints to bringing BUGs into non-emergency use, and (6) problems and issues associated with including BUGs owners to bring their units into service.	NOE	
2001108123	Regional Generating Capacity and Demand Reduction Energy Commission Sacramento--Sacramento The program will focus on two areas: regional electricity impacts and providing enhanced products for customer choice. Sacramento County can be considered a region because of its unique climate and the fact that SMUD is virtually the sole provider of electricity within Sacramento County. SMUD's primary focus in the	NOE

	<p>ReGen Program is on regional electricity impacts. Because of Sacramento's intense summer peak-period demand for electricity, the Program will develop products and technologies generating capacity. The Program will reduce Sacramento's demand for summertime electricity by developing new, less expensive photovoltaic technologies and installing them on homes and buildings throughout Sacramento. The Program will develop regional generating capacity by researching and developing new wind, biomass and solar thermal technologies that can be used within Sacramento and in the surrounding countryside inside and outside of the SMUD service territory. Many of these products and technologies, while well-suited for Sacramento and its unique climate, will also work well throughout California.</p>		
2001108124	<p>Linked Renewable Energy Technology Research and Development Program Energy Commission Roseville--Placer</p> <p>The Public Power Renewable Energy Action Team's (PPREAT) proposal to the CEC includes a linked research and development program related to 8 different renewable energy technologies: biogas, biomass, geothermal, wind, photovoltaic, solar thermal electric, ocean, and landfill gas. The research program encompasses 14 projects spread across all four of the state emphasis areas for this RFP, matching information about resources and technology potential with superior technology and commitment to implement results by : (1) Conducting analyses of resource availability and access to transmission capacity; (2) Modifying existing facilities to improve technical and cost performance; (3) Fielding packaging distributed generation options and tools to evaluate their most valuable application; and (4) Developing advanced technologies that will expand public power entities' options to renewable resource acquisition.</p>	NOE	
2001108125	<p>California Wind Energy Resource Mapping Services Energy Commission California City--</p> <p>The purpose of this contract is to develop more accurate and appropriate wind resource maps for California using state-of-the-art modeling techniques. These maps will help to better define wind corridors as well as identify new potential sites for wind energy integration. This meets the PIER goal of facilitating wind energy planning and siting decision as well as providing the most current wind resource data for the public.</p>	NOE	
2001108126	<p>Summer Electric Load Reduction in California's Cast Metal Industries Energy Commission --</p> <p>The Purpose of this project is to develop energy efficient metal melting methods and operating procedures for the metal casting industry in California. Metal melting accounts for 55% of the energy used in a metal casting facility and the current energy crisis has significantly impacted the industry. These methods and procedures will be developed quickly for use by metal casters in the summer of 2001 and beyond.</p>	NOE

	<p>The parcels will range in size from 0.80 acres to 7.90 acres. Parcel six has no direct access to a street, making it a landlocked parcel. A variance will be required in order for this parcel to be permitted. The site is bounded by existing residential to the south, existing commercial to the east, area designated as residential to the north, with a designated commercial area to the west separated by an open space corridor. The project site is located in the southeast corner of the Orangecrest Specific Plan, Planning area two.</p>		
2001101043	<p>Alessandro Mini-Storage Facility Riverside, Planning Department, City of Riverside--Riverside</p> <p>The property in question consists of five consecutive undeveloped parcels, totaling 7.6 acres in the Sycamore Canyon Business Park Specific Plan Area. The applicant is proposing to construct a self-storage facility consisting of thirteen mini-storage buildings ranging from 730 to 11,800-square feet, for a total of 77,368-square feet, and a two-story, 3,040-square foot caretaker's unit/office. All storage buildings will be no higher than twelve-feet. The caretaker's unit will be approximately 1,520-square-feet on the second floor consisting of two bedrooms, two bathrooms, kitchen, dining and living rooms, and a deck. The office will be located on the first floor consisting of approximately 810-square-feet. Five customer parking stalls will be provided with an additional two-car garage attached to the office/caretaker's unit, totaling seven parking spaces.</p>	Neg	11/05/2001
2001101046	<p>Sea Smoke Cellars Winery Project Buellton, City of Buellton--Santa Barbara</p> <p>The proposed project involves allowing the development of a new winery and wine warehouse totaling 56,500 square feet (1.3 acres) of covered building area on one existing parcel totaling 8.73 acres (refer to Figure 3, Site Plan). The project involves 41,400 square feet (0.9 acre) of building and 15,100 square feet (0.4 acre) of area under canopy. The total site coverage would be approximately 14.4%. The proposed winery/warehouse building would be located in the northwest portion of the site. The winery/warehouse building would contain a hospitality center, offices, laboratory, conference room, palate storage area, bottling line, and fermentation bay (including a crush pad). The site plan would dedicate approximately 37.6% (3.28 acres) of the site to open space. This would include a vineyard area proposed in the southern portion of the site under a separate Conditional Use Permit (CUP). The vineyard would be approximately 2.25 acres, and would be oriented in an east/west direction.</p>	Neg	11/05/2001
2001101047	<p>Reclamation Plan 2001-1/Cecil R. Jackson Exploration/ C.R. Briggs Inyo County Planning Department --Inyo</p> <p>Project is to reclaim drill holes & exploration roads on a 3,000 acre claim block. Roads will disturb 100 acres of ground. Any mining that takes place because of this exploration project will require additional CEQA review.</p>	Neg	11/05/2001

2001101048	CU-033-012/VC-004-989 Water Treatment Plant and Street Vacation Riverside, Planning Department, City of Riverside--Riverside The proposed project involves the construction of a 21.5 million gallon per day (15,000 gallons per minute) groundwater treatment plant on an approximately 1.2 acre site. The proposed project will treat groundwater extracted from the City's existing Palmyrita, Electric Street, Moore-Griffith, and Twin Springs Wells, by a Granula Activated Carbon (GAC) technique. The proposed treatment plant will consist of 15 treatment vessels measuring approximately 10 feet in diameter and 25 feet in height. In addition, a holding tank, measuring 16 feet in diameter and 16 feet in height, will be constructed on the site for transient storage of backwash water, along with a 400 gallons per minute (gpm) 15 HP pump. The plant will be sited and plumbed for future expansion of five additional treatment vessels.	Neg	11/05/2001
2001101049	Route 30-Drainage Channel Rehabilitation and Restoration Caltrans #8 Redlands--San Bernardino Construct four grouted protective rock slope check dams & reconstruct failed portions of existing slope. 2001102032	DRB-00-06 (Riverpath Del Mar) Del Mar, City of Del Mar--San Diego This project is for a trail along the south side of the San Dieguito River. The project consists of a pedestrian trail and landscaping improvements for passive public use on a roughly one-acre site. Included are five-foot wide ADA accessible viewing areas, and an ADA accessible picnic table. Landscape plant materials would be both native and naturalized species compatible with coastal lagoon wetland and upland coastal sage scrub habitats.	Neg	11/05/2001
2001102035	Scott-Noga Trustee Tree Removal Humboldt County --Humboldt The applicant proposes a California Department of Forestry and Fire Production "Fire Hazard Trees within 150 feet of a Residence Exemption". The trees to be removed are located on APN 501-241-02, and are within 150 feet of a residence and garage located on APN 501-241-20. The applicant proposes to remove 9 young growth redwood and spruce trees and two (2) old growth redwood trees. Approximately 54 trees of a variety of species will remain on the property after the timber removal operations, including three (3) old growth redwood trees. No new roads or landing areas will be developed with the project; an existing skid road on the subject property and an existing log landing located on APN 500-231-07 will be used for the timber removal operation. The proposed project will generate approximately 16-20 truck loads of timber or approximately 50 thousand board feet. The timber operations will be limited to between the hours of 8:00 AM and 6:00 P.M. Monday through Friday, and are expected to be completed within two weeks, weather permitting. There may be up to five (5) logging trucks entering and leaving the site any given day. The haul route used by the trucks will include Golf Course Road, Old Arcata Road, Bayside Cutoff and Highway 101. The slash from the proposed timber harvest is proposed to be chipped or burned. Exposed areas of bare mineral soil will be covered by mulch or an equivalent material to prevent soil erosion. The subject parcel and neighboring properties are served with on-site sewage disposal and on-site water systems.	Neg	11/05/2001

The Project is proposed to include three relocatable classrooms, totaling approximately 4,500 square feet. The Project contemplates construction of classroom facilities organized in single-story buildings with covered walkways and fencing. Facilities to be constructed include classrooms for up to 39 preschool students age three months through pre-kindergarten; kitchenettes within the classrooms; parking facilities for visitors and staff with approximately 38 parking spaces; parent loading/drop-off area; bus loading/drop-off area; and hardscape and turf playfields. Lighting includes low level security lighting, signage lighting, and illumination of the surface parking lot and associated pedestrian areas.	NOD

2001082039	<p>Paradise Pines/Firhaven Shaded Fuel Break Forestry and Fire Protection, Department of Paradise--Butte</p> <p>This project will result in a 100 to 200 foot wide shaded fuel break extending approximately sixteen miles around the community of Paradise Pines and Firhaven development. The shaded fuel break will be created using fire crews or contractors applying manual removal techniques. Debris will be chipped and returned to the treated areas, burned on site or removed as biomass fuel. In inaccessible locations, piled brush may be burned. All dead material approximately 1/4" to 3" in diameter will be chipped or removed. Select dead material between 3" and 8" will be chipped or removed. Larger dead material will be left in place. Brush will be cut and chipped. Conifers and unhealthy hardwood trees will be removed if under 8 inches DBH. Remaining conifers will be pruned to 20 feet or 1/3rd healthy, live crown, whichever is less. Remaining hardwoods will be pruned so that no branches extend within 10 feet of the ground. Spacing between remaining conifers and hardwoods shall be a minimum of 20 feet between stems. In areas compromised primarily of brush stands, select healthy species will be retained with fifteen to twenty foot spacing. An effort will be made to protect conifers and hardwood species within the brush stands.</p>	NOD	
2001082068	<p>Dowdy Ranch Day-Use Development Project at Henry W. Coe State Park Parks and Recreation, Department of Morgan Hill--Santa Clara</p> <p>The proposed project would develop a new day-use recreational area at the Dowdy ranch site, which is intended to provide seasonal public access to the southeastern side of Henry W. Coe State Park. The new day-use facilities would include: a park office/visitor center to provide interpretative and trailhead information; group/family picnic sites; an equestrian staging area; trailhead access to the backcountry area; new parking areas, which include 46 paved parking spaces and 10 horse-trailer spaces; two 100-series restrooms; and necessary water and utilities. In addition, the proposed project would provide safer access to the Dowdy Ranch site by improving the entrance road (Kaiser-Aetna Road) with the addition of base rock and minor grading, compaction, and erosion control measures as needed (the road would retain its current footprint). Internal circulation would also be improved through the redesign and paving of internal roads. Other project features include erosion control measures throughout the project area, including two culvert installations with overside road drains along Kaiser-Aetna Road and the installations with overside road drains along Kaiser-Aetna Road and the installation of rock apron and energy dissipator used to repair an existing culvert at the Dowdy Ranch Site.</p>	NOD

2001109010	<p>Streambed Alteration Agreement R3-2001-0642 Forestry and Fire Protection, Department of --Mendocino</p> <p>The applicant proposes three proposed project, that have the potential to substantially divert or obstruct the natural flow or substantially change the streambed, channel, or bank of a watercourse. The projects involve: (1) installation of a temporary crossing (railcar bridge) on a Class I watercourse (North Fork Ten Mile River); and (2) removal of an 18-inch diameter culvert from an unnamed Class II watercourse crossing. All projects are located in the Ten Mile River drainage, Mendocino County. The property owner is Cambell Timberland Management, LLC, Fort Bragg, California. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement R3-2001-0642, pursuant to Section 1603 of the Fish and Game Code to the project applicant, Michael Williams/Cambell Timberland Management.</p>	NOD	
2001109013	<p>Almeida Subdivision Gilroy, City of Gilroy--Santa Clara</p> <p>1.68-acre parcel subdivided into seven residential lots. The proposed project will also construct a storm drain outlet in the west bank of the West Branch of Llagas Creek in Gilroy, Santa Clara County. Water from the housing tract will be directed through the storm drain system to the outlet. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number R3-2001-0654 pursuant to Section 1603 of the Fish and Game Code to the project operator, Steven Arnold.</p>	NOD	
2001108132	<p>Streambed Alteration Agreement Concerning San Ramon Canyon Storm Drain and Landslide Stabilization Project (R5-2001-0211). Fish & Game #5 Rancho Palos Verdes--Los Angeles</p> <p>The Operator proposes to alter the streambed to replace the undersized storm drainage system south of Palos Verdes Drive East and construct storm drainage and landslide stabilization improvements within the southeasterly-trending canyon located between San Ramon Drive and Calle Aventura. The proposed project will be carried out in two phases. Phase 1, which is intended to stabilize the landslide prior to the rainy season, involves the placement of an approximately 15,000 cubic yard "plug" at the base of the landslide along with the construction of permanent drainage facilities within the "plug" and an energy dissipation structure, cut-off wall and rip rap at the outlet of the pipe. Phase II involves the placement of approximately 50,000 cubic yards of imported soil to provide additional buttress strength for the slope. The proposed slope would be a maximum gradient of 2:1 with a height of approximately 120 feet. A brow ditch and five terrace drains will also be constructed. The brow ditch, which will be located at the daylight line, will be constructed of welded wire mesh encased in concrete and will have maximum dimensions of five feet wide and two feet deep. The five terrace drains will be constructed of the same material and will be three feet wide and 18 inches deep. Phase II also includes the revegetation of the landslide. Revegetation will consist of coastal sage scrub.</p>	NOE

2001108135	Beale Air Force Base, Closure Plan for Central Storage Facility (Building 539) Toxic Substances Control, Department of --Yuba The Closure Plan for the Central Storage Facility (CSF) operations identifies the steps necessary to formally close the involved hazardous waste management units per federal and state regulations. Operations at the CSF included waste storage in drums and containers. The CSF is 60 feet (north to south) by 120 feet (east to west) housing two banks of fire-rated storage modules. The north bank is composed of six 20-foot by 24-foot modules and one 19.33-foot by 24-foot staging area. The maximum capacity of the modules ranges from, 3,900 to 5,800 gallons. A load/unload deck is located in front of the building. There are no permanent ancillary equipment associated with storage or handling of hazardous waste. The eleven storage modules are constructed with an integral containment system consisting of a 0.5-foot vertical containment wall surrounding a monolithic concrete slab. All surfaces, including the containment structure, are coated with epoxy resin primer and top coating. A spill containment sump is used to collect any discharges from the load/unload deck. Areas requiring decontamination are epoxy coated floors, 0.5-foot vertical containment walls within each storage module and the spill containment sump. The Closure Plan proposes to decontaminate those areas. The decontamination will be performed by steam cleaning the module floors and containment structures by means of a 3,000 psi small tip nozzle. The spill containment sump will be cleaned by pressure washing of the side and the bottom. After completion of closure, the facility will be used as a 90 day hazardous waste storage facility.	NOE

	proposal includes a disposition and development agreement, a statutory development agreement, a vesting tentative map for subdivision of 375 acres, overall project design review, a conditional use permit for the residential component, a conditional use permit for the timeshare component, and site plan review for the hotel component. Portions of the land north, south, and west of the project site contain single-family residential development constructed in the 1950s and 1960s as military housing. A proposed 380 lot single-family redevelopment at the Hayes site is currently under environmental review by the City of Seaside. Sunbay Apartment complex (high density residential) and Fitch Middle School are located to the south of the project site and east of the Hayes Housing area. The primary land use to the north is occupied military housing.		
2001101063	UVP Extension Project (Hummel Drive to Blosser Road) Santa Maria, City of Santa Maria--Santa Barbara The City of Santa Maria and the County of Santa Barbara are proposing to extend Union Valley Parkway (UVP), a 4-lane roadway, from Hummel Drive to State Route (SR) 135, to construct an at-grade connection at SR 135, and to extend a new four lane roadway from SR 135 to Blosser Road. As part of the UVP extension project, an existing frontage road, Orcutt Road, would be realigned to intersect with Union Valley Parkway and an intersection would be created at California Boulevard. The project's Area of Potential Effect (APE) includes a total of approximately 56 acres of land and extends linearly approximately 8,500 feet in length. A portion of the APE (approximately 29.3 acres) falls under the jurisdiction of the City of Santa Maria, while a smaller portion (approximately 27 acres) of the extension project lies within the County of Santa Barbara jurisdictional boundaries, in the community of Orcutt.	NOP	11/07/2001
2001102039	Eldridge-Madrone Pipeline Sonoma County Water Agency Sonoma--Sonoma The project consists of the construction, maintenance, and operation of approximately 8,500 feet of 27-inch diameter underground mortar-lined and coated steel pipe. The pipeline would generally extend from the Agency's Eldridge Tanks to Madrone Road. The project would include connections to existing pipeline facilities, valves, cathodic protection, and appurtenances. An access area approximately 50-feet wide would be required along the length of the pipeline during construction. Alternatives to the project, including alternative pipeline routes, may be evaluated in the Initial Study based on input from the public and regulatory agencies during the NOP review period.	NOP	11/08/2001
2001102055	Juniper Networks Campus Sunnyvale, City of Sunnyvale--Santa Clara The proposed project would involve the phased construction of a business park campus that would serve as the headquarters for Juniper Networks. At completion, the project would include 2,345,000 square feet (sf) of research and development/office space, 135,000 sf of employee-serving retail space, a 60,000 sf "Special Use" Building, a 200 to 350 room hotel, a landscaped pedestrian and bicycle circulation network, open space and recreational areas, and surface and structural parking facilities. 2001108205	Streambed Alteration Agreement Concerning Lemon Creek (R5-2001-0224) Fish & Game #5 Walnut--Los Angeles The Operator proposes to alter the banks of a streambed to repair a damaged outlet structure on the bank of Lemon Creek. During the storm of February, 1998, the flood waters eroded the left bank and base of the outlet structure for the storm drain from Tract 31337. This erosion caused the collapse of the outlet structure. The stabilization of the left bank will be performed by temporarily cutting the bank back approximately ten feet and constructing a gabion block retaining wall. After the construction of the gabion retaining wall, the bank will be backfilled to its existing location. The outlet structure will be reconstructed with 24" RCP stormdrain pipe. The 12' by 12' rip rap pad will be constructed of gabion blocks. The construction of these repairs will require the use of standard grading and construction machinery. Vehicular access to the worksite will be via the	NOE

2001108213	Lafayette Creek Retaining Wall Fish & Game #3 Lafayette--Contra Costa The operator is proposing to repair a failing retaining wall along the south bank of Lafayette Creek adjacent to the home at 1049 Via Nueva, Lafayette, Contra Costa County. Approximately 72 feet upstream from the street, starting at the 7th post and proceeding upstream to the 18th post the existing failing railroad ties will be removed and replaced with new railroad ties or pressure treated lumber. Existing posts will remain, no changes will be made to the existing foot print of the wall.	NOE	
2001108214	North Fork Dam Water Resources, Department of --Santa Clara Phase 1 spillway wall repair.	NOE	
2001108215	Sonoma Creek Effluent Line Fish & Game #3 --Sonoma The operator proposes to install a 1 to 1 1/4 inch PVC septic line across Sonoma Creek to transfer effluent from the home site at 1324 Dawn Hill Road to the leach field at 1325 Warm Springs Road, Kenwood, Sonoma County, Assessor's Parcel Numbers: 050-220-001 and 050-210-005. The septic line will be encased in a 2-inch galvanized water tight casing to prevent any sewage from entering into the Creek in case of a break in the line. Two concrete cable supports will be poured on the top of each bank to support the septic line. The line will be suspended approximately 20 feet over the Creek and will span from bank to bank, approximately 75 feet. All work will be done outside the channel. Issuance of Streambed Alteration Agreement Number R3-2001-0736 pursuant to Fish and Game Code Section 1603.	NOE	
2001108216	Sulpher Springs Creek Bridge Fish & Game #3 St. Helena--Napa The operator proposes to temporarily repair a bridge over Sulpher Springs Creek in St. Helena, Napa County, Assessor's Parcel Number 027-020-051. The bridge was constructed in approximately 1905 and serves as sole access for 6 families and 2 vineyard operations. The bridge abutments have been severely undercut, causing instability and possible failure. To stabilize the bridge and arresting future undercutting, an excavator will collapse the existing undercut concrete and rip rap. Pieces of broken concrete less than 50 pounds in weight will be removed and new 1/2 ton and larger stone rip rap will be imported to fill the voids and to stabilize the banks and abutments. Once the bridge has been permanently stabilized or replaced, an SB 271 funded fish ladder will be installed to assist migrating salmon past the bridge, allowing them access to approximately 2 1/2 miles of prime spawning and nursery habitat above this location. Issuance of Streambed Alteration Agreement Number R3-2001-0865 pursuant to Fish and Game Code Section 1603.	NOE

2001101073	Big Country Ranch Specific Plan and Major Subdivision San Diego County Department of Planning and Land Use --San Diego The project proposes the subdivision of 2,280 acres into 70 lots for single-family residential development plus 5 open space lots. A total of 700 acres (31%) of the property would be devoted to private residential lots. Three recreation areas are identified in the proposed Specific Plan; Subsequent permits would be required to operate the recreational areas once the uses are defined. In addition, a 13-acre site has been identified in the central area of the property to support some form of equestrian facilities for the exclusive use of Big Country Ranch residents. Additional amenities are proposed. Approximately two-thirds of the property (1,540 acres) including the entire floodplain of Tule Creek would be devoted to open space.	NOP	11/09/2001
2001101074	Francis Parker Lower School Phase 2 San Diego, City of San Diego--San Diego The Francis Parker project proposes to vacate Plumosa Way and expand and remodel the existing 16,791-square-foot elementary school on an existing 4.86-acre site. The project would require the demolition of the existing north wing of the school, one-and two-story classrooms, and an existing one-story residence. Proposed construction activities would consist of 18,027 square feet of new building space, 4,708 square feet of interior tenant improvements, and a new 33-space parking lot. Overall, the expansion and remodeling would provide for a library, a science and technology building, a cafeteria, and classrooms. There would be no increase in enrollment as a result of this project (a portion of Blocks 19, 20, 21, and 22 of Arnold and Choate's Addition, Map No. 334).	NOP	11/09/2001

2001101076	Riverview Park Project Buellton, City of Buellton--Santa Barbara The park is intended to provide recreational opportunities for the entire City community. The exact development plans for the park have not been finalized at this time; however, the following features would most likely be included, but not be limited to: parking lot, softball, football, soccer playing fields, bathroom facilities, picnic area, "band shell" for small outdoor related performances, and children's play area. The 11.31-acre Central Property of the project site was dedicated as part of the Meadow Ridge Subdivision in 1996. Two additional parcels totaling approximately 3.02 acres adjacent to and west of the central parcel were offered for dedication at that time. In addition, all or part of the approximately 25.35-acre East Property may ultimately be available for use complementary to a park on the Central Property. As a result, all three Properties will be considered as the project site in discussing park feasibility and any potential recommended mitigation. The park will likely be developed in phases to address environmental constraints and the nature of available funding for the project.	Neg	11/09/2001

	2) Change the zoning from Specific Plan to Low Density Residential and Golf Course and from Controlled Development and Residential Agriculture to Low Density Residential with an equestrian overlay district to facilitate the future annexation of the property into the City of La Quinta.		
2001109022	Sam Trans Bus Evaluation Study Implementing Project-Addendum for Regional Express Bus Service Transportation Commission --San Mateo, San Francisco, Santa Clara Negative Declaration for original Sam Trans Bus Evaluation Study Implementation Project studied modification or elimination of certain Sam Trans routes identified in the Sam Trans Bus Evaluation Study; Addendum addresses addition of Regional Express Bus Service along El Camino Real corridor.	NOD	
2001108230	Streambed Alteration Agreement (R5-2001-0268) to Maintain a Drainage Inlet and Stabilize an Adjacent Slope Fish & Game #5 --Ventura The Operator proposes to alter the stream channel by removing debris that is currently blocking drainage of an existing stand pipe, revegetate the slope and low-flow channel upstream of the stand pipe, and re-grade portions of the slope north of the low-flow to mitigate erosional effects of potential future land slides. The proposed project permanently impacts no more than 0.31 acre of stream bed and bank. The area is 90% devoid of vegetation; the 10% of vegetated area is dominated by exotic species, primarily mustard and sweet fennel. The operator shall mitigate for impacts as follows: hydroseed and install container plants on the slope and drainage areas with native plants as per the submitted planting plan. A total of 1,392 one-gallon container plants will be planted. All exotic vegetation in the project area shall be removed.	NOE	
2001108231	Approval of Changes to Conditions of Certifications AQ-24 & -27, Pastoria Energy Facility (Docket #99-AFC-7C) Energy Commission Bakersfield--Kern Pastoria Energy Facility is a nominally-rated 750 megawatt combined-cycle natural gas power plant currently under construction and scheduled for commercial operation in early 2003. The proposed project modification is to allow emission reduction credits to be surrendered prior to the start of operation of the power plant, rather than prior to the commencement of construction.	NOE	
2001108232	Replace Fire Road Culverts Parks and Recreation, Department of --Marin Replace all existing culverts along the Fire Road encircling Angel Island State Park to protect road stability and prevent erosion. All head and foot walls are recognized as historic structures and will be avoided or treated in accordance with Secretary of the Interior's Standards for the Treatment of Historic Properties. No culverts will be downsized and work will occur in previously disturbed areas. Photographs will be taken of all phases of the project and photos retained for future reference.	NOE

2001108233	<p>CCC Building (Area Office) Restoration Parks and Recreation, Department of --Sonoma</p> <p>Repair, stabilize, and restore the historic CCC Building currently being used as the DPR Russian River Area Office at Armstrong Redwoods State Reserve. Building will be removed from the existing foundation to allow construction of a new reinforced concrete foundation. After reinstallation of new foundation, building will be fumigated. All elements of structure (flooring, joists, studs, etc.) will be inspected and repaired or replaced as necessary. Existing picture window will be replaced with window designed to match existing period windows in other portions of the building. Existing roofing will be removed and replaced in kind (asphalt composition shingles). A new perimeter drain will be installed at the new footing. Install ADA compliant access ramp on side of building facing parking area; adapt existing restroom to ADA standards. Building will be photographed before, during, and after reconstruction. All work will be done in accordance with the Secretary of the Interior's Standards for the Treatment of Historic Properties. If work does not commence prior to October 15th, openings identified as potential access for bats will be blocked with caulking and/or metal flashing until work can begin.</p>	NOE	
2001108234	<p>Ferrytenders Residence Foundation Stabilization Parks and Recreation, Department of --Sonoma</p> <p>Repair/reconstruct foundation and floor framing of Ferrytenders Residence at Sonoma Coast State Beach to adequately support structure and improve drainage. Existing graywater drain for clothes washer will be connected into septic system. Limited areas around the building will be regraded to allow rainwater to drain away from the building. Existing concrete patio will be demolished and reconstructed approximately 8 feet from the building to prevent rainwater from draining toward the foundation. Existing deteriorated concrete walks will be replaced in kind on current footprint. Exterior of building will be painted with historically consistent colors. All work will be done in accordance with the Secretary of the Interior's Standards for the Treatment of Historic Properties.</p>	NOE	
2001108235	<p>Water System Well Rehabilitation Parks and Recreation, Department of --Sonoma</p> <p>Inspect and rehabilitate two existing wells at Fort Ross State Historic Park to reduce iron bacteria formations on well screens and increase well production. Wells will be inspected by camera to determine condition of well and casing. If no significant damage is detected, well cleaning agents will be injected and mechanized brushing, surging, and pumping will be initiated to loosen encrustations. All additives and debris will then be pumped from the wells, contained, and removed from the site. Pumping will continue until well water meets the Sonoma County Health Department potability standards. Areas immediately adjacent to the wells and the wells themselves will be completely surrounded with berms or other containment methods to prevent spillage of materials outside well sites. Additionally, materials to neutralize any potential spill will be available on-site throughout duration of the project. Materials will be disposed of in a manner consistent with applicable State, federal, and local hazardous material disposal requirements.</p>	NOE

2001108236	<p>Replace Combo Buildings - Wildcat Campground Parks and Recreation, Department of --Mendocino</p> <p>Replace two existing combination (restroom/shower) buildings in the Wildcat Campground at Hendy Woods State Park to provide improved services and ADA access. The new structures will be slightly larger than the existing structures, due to current building codes and ADA requirements. One of the buildings will overlap the footprint of the existing structure, while the second will be located on the same site, adjacent to the existing footprint, to minimize impact and improve accessibility. No soil disturbance will occur, to a depth of two feet, within the Structural Root Zone of the old growth Redwoods and Douglas Firs adjacent to the existing buildings. Additionally, work will only occur between September 1 and February 1 to protect Marbled Murrelet and Northern Spotted Owl habitat.</p>	NOE	
2001108237	<p>Repair North Wing Windows - Casa Grande Parks and Recreation, Department of --San Luis Obispo</p> <p>Repair and repaint all rear window slashes and lower northeast theater door in the north wing of Casa Grande at Hearst San Simeon State Historic Monument. Exterior frames will be stripped, primed with rust-inhibiting primer, and finished with original Munsell paint type and color. Interior ashes will be sanded and repainted to match original colors. All hardware will be cleaned, repaired/adjusted, and replaced; brass screening will be repaired or replaced in kind. Metal-clad theater door will be restored, salvaging the maximum historic fabric possible, and repainted to match original finish. All work will be done in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties. The windows and door will be photographed before, during, and after completion of the project.</p>	NOE	
2001108238	<p>Macedo Ranch Interpretive Center Rehabilitation Parks and Recreation, Department of --Contra Costa</p> <p>Construct improvements including: three shade ramadas, two interpretive panels, and landscaping. Repair the existing barn foundation. Paint the barn and garage. Install irrigation system.</p>	NOE	
2001108239	<p>Decking, Walkway, and Stair Repair Parks and Recreation, Department of --Marin</p> <p>Repair or replace deteriorating decking, walkways and stairs at four buildings (Pelican, Heron, Seagull and Sandpiper).</p>	NOE	
2001108240	<p>Issuance of Streambed Alteration to Agreement #01-0502 Fish & Game #1 --Humboldt</p> <p>Minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees except for forestry and agricultural purposes.</p>	NOE

<u>Documents Received on Thursday, October 11, 2001</u>			
2001108241	Issuance of Streambed Alteration to Agreement #00-0694 Fish & Game #1 --Del Norte Repair, maintenance, or minor alteration of existing public structures or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination.	NOE	
2001108242	Issuance of Streambed Alteration to Agreement #01-0436 Fish & Game #1 --Humboldt The project will install 4 relief cross-drain culverts to prevent further erosion due to drainage of springs adjacent to a seasonal road, on unnamed tributaries to McDonald Creek, Humboldt County. No removal of trees is associated with this project. The project will have no significant effect on the environment.	NOE	
2001108243	Issuance of Streambed Alteration Agreement to Notification #01-0474 Fish & Game #1 --Tehama The project will remove approximately 3,500 cubic yards of gravel from Thomes Creek, Tehama County, for private use on ranch roads. The project will have no significant adverse effect on the environment.	NOE	
2001108244	Issuance of Streambed Alteration Agreement #01-0501 Fish & Game #1 --Siskiyou This project will install a telephone conduit buried six (6) feet deep for telephone cable, replacing a conduit which was washed out by previous winter storm flows. The project also provides for rock slope protection along the right channel bank to prevent high flow erosion. The project is located on Kangaroo Creek tributary to Scott River, Siskiyou County. The project replaces an existing facility performing the same purpose with no increase in capacity of the facility.	NOE	
2001108245	Issuance of Streambed Alteration to Agreement #01-0427 Fish & Game #1 --Humboldt The project is the replacement of an existing failed and undersized culvert on a spur road of the main haul road C-2000, on an unnamed tributary to Redwood Creek, Humboldt County.	NOE	
2001108246	Issuance of Streambed Alteration to Agreement #01-0397, Unnamed Tributaries of Little River, Humboldt County Fish & Game #1 --Humboldt Replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced.	NOE	
2001108247	Issuance of Streambed Alteration to Agreement #01-0430, Treasure Creek, a Tributary to Coffee Creek in Trinity County Fish & Game #1 --Trinity The project will install a culvert crossing across Treasure Creek, a tributary of Coffee Creek in Trinity County, and will place rock slope protection adjacent to the	NOE

	culvert to prevent against erosion of the crossing. Prior to installation, existing deposited sediments upstream and downstream of the proposed culvert will be removed. The project represents a minor alteration in condition of land and water. No mature trees will be removed. The project will have no significant effect on the environment.		
2001108248	Issuance of Streambed Alteration to Agreement #01-0428, Unnamed Tributaries of Cedar and Willow Creeks, Humboldt County Fish & Game #1 --Humboldt The project is the replacement of 17 failed and/or undersized culverts on unnamed tributaries to Cedar and Willow Creeks, Humboldt County. The new culverts are located in the same sites as the existing stream crossings. The project will have no significant effect on the environment.	NOE	
2001108249	Issuance of Streambed Alteration to Agreement #01-0378, Unnamed Tributary to South Fork Indian Creek, Siskiyou County Fish & Game #1 --Siskiyou This project will install a water diversion consisting of a 4-inch diameter steel pipe and a diversion structure which shall limit diverted volumes and resist washout by high annual flows. The project will also re-stabilize an eroding stream bank adjacent to the diversion site by placement of rock slope protection and geotextile fabric. The project represents a minor alteration in land, water and/or vegetation and does not involve removal of trees. The project will have no significant adverse effect on the environment.	NOE	
2001108250	Issuance of Streambed Alteration to Agreement #00-0638, Unnamed Tributaries of Stone Lagoon, Humboldt County Fish & Game #1 Blue Lake--Humboldt The project involves cleaning out by means of vacuum mechanical equipment an existing culvert at Highway 101 Post Mile 115.3, on an unnamed tributary to Stone Lagoon, Humboldt County. The project will have no significant effect on the environment.	NOE	
2001108251	Issuance of Streambed Alteration Agreement #00-0664, Anderson Creek, Tributary to Sacramento River, Shasta County Fish & Game #1 Anderson--Shasta The project will construct a utility crossing (water line) across an intermittent tributary to the Sacramento River, and place natural rock slope protection along the bank adjacent to the crossing, representing a minor alteration to land, water and/or vegetation without removal of trees. The project will have no significant effect on the environment.	NOE	
2001108252	Issuance of Streambed Alteration to Agreement # 01-0443, South Fork Cow Creek, Shasta County Fish & Game #1 --Shasta This project will install a 60" diameter, 16 foot deep water gallery and a 24" diameter, 40 foot long infiltration feeder line in South Fork Cow Creek, Shasta	NOE

	County, to supply domestic and irrigation water to properties situated in Section 10, T 31N, R 2W. The project involves a minor alteration in condition of land and water associated with trenching and backfilling. The project will have no significant effect on the environment.		
2001108253	Issuance of Streambed Alteration to Agreement # 01-0437, Martin Slough, Humboldt County Fish & Game #1 Eureka--Humboldt The project involves stream restoration work to Martin Slough, tributary to Cedar Creek, Humboldt County, on land described as Assessor's Parcel 018-101-015, owned by Mr. Paul Bareilles. Project will remove built-up gravel and debris which are restricting flow. The streambed will be widened and sloped at 1:1 slope and trees and grass hay will be planted to prevent bank erosion. The Project will have no significant effect on the environment.	NOE	
2001108254	Issuance of Streambed Alteration to Agreement #01-0361, Browns Creek, Trinity County Fish & Game #1 --Trinity This project will install a concrete culvert pipe outside of the summer stream channel for a sump to provide domestic water for an existing dwelling in Browns Creek in Trinity County. The project will have no significant effect on the environment.	NOE	
2001108255	Issuance of Streambed Alteration to Agreement #01-0142, Unnamed Tributary to Bear Gulch, Humboldt County Fish & Game #1 Eureka--Humboldt The project will install a 24-inch diameter culvert to replace a failed drainage crossing on a seasonal haul road (Road R-9-1-1), and will repair a sink hole by excavation and backfill and, if necessary due to subsurface flow, installation of an 18-inch diameter culvert. No increase in capacity of the road will result. Project is located on an unnamed tributary to Bear Gulch in Humboldt County. The project will have no significant effect on the environment.	NOE	
2001108256	Issuance of Streambed Alteration Agreement to #01-0149, Red Bank Creek, a Tributary of the Sacramento River, Tehama County Fish & Game #1 Red Bluff--Tehama This project will armor approximately 550 feet of the right bank on Red Bank Creek. The project will remove tamerisk (salt cedar) from the project area. The streambanks will be planted with willow and poplar trees. There will be no significant adverse effects on the environment as a result of this project.	NOE	
2001108257	Issuance of Streambed Alteration to Agreement #01-0386, South Fork Bear Creek, Shasta County Fish & Game #1 --Shasta The project will provide for maintenance of the existing flow measurement weir at the South Fork Bear Creek Hydroelectric Facility in Shasta County, by temporarily diverting flow and removing approximately 15 yards of stream channel materials	NOE

	adjacent to the weir. The project will have no significant effect on the environment.		
2001108258	Issuance of Streambed Alteration to Agreement #01-0385, Unnamed Tributary to Sacramento River, Shasta County Fish & Game #1 Anderson--Shasta The project will construct a minor earthen dam no more than six feet in height across an ephemeral drainage way, tributary to the Sacramento River, creating a pond of less than eight acre feet in volume. The dam and resulting pond represent a minor alteration to land and water and will result in no removal of trees. Project also provides for repair and maintenance of an existing pond, an existing topographical feature on the site. The project will have no significant effect on the environment.	NOE	
2001108259	Issuance of Streambed Alteration to Agreement #01-0458, Little Shasta River, Siskiyou County Fish & Game #1 --Siskiyou This project will place a boulder weir below an existing concrete diversion dam to raise the water surface elevation for fish passage and incorporate fish way into existing dam on Little Shasta River, in Siskiyou County. Work will proceed during minimum flow period. The project involves no expansion of existing uses. The project will have no significant adverse effects on the environment.	NOE	
2001108260	Issuance of Streambed Alteration to Agreement #01-0308, Eel River, Humboldt County Fish & Game #1 --Humboldt The project will remove built-up stream gravel to improve flow capacity at the Holmes-Larabee summer bridge site, on the Eel River in Humboldt County. The project involves no expansion of existing uses. Equipment will not be used in the live stream channel. The project will have no significant effect on the environment.	NOE	
2001108261	Issuance of Streambed Alteration to Agreement #01-0351, Unnamed Tributary to Maple Creek, Humboldt County Fish & Game #1 Trinidad--Humboldt The project will remove an existing plugged culvert which diverts flow around the culvert causing erosion, on an unnamed tributary to Maple Creek in Humboldt County. The project does not involve removal of healthy, mature, scenic trees. The project will have no significant effect on the environment.	NOE	
2001108262	Issuance of Streambed Alteration to Agreement #01-0139, Unnamed Tributary to Mill Creek, Humboldt County Fish & Game #1 Arcata--Humboldt The project will remove approximately 400 lineal feet under-story vegetation and provide rip rap for erosion control and maintenance purposes along an unnamed man made drainage ditch tributary to Mill Creek in McKinleyville, Humboldt County. The project does not involve removal of healthy, mature, scenic trees. The project will have no significant effects on the environment.	NOE

2001108263	<p>Issuance of Streambed Alteration to Agreement #01-0435, Pine Creek, Tehama County Fish & Game #1 --Tehama</p> <p>This project is located on Pine Creek, tributary to South Fork Cottonwood Creek in Tehama County. The project will remove approximately 600 cubic yards of gravel from center of creek and restore approximately 200 feet of creek bank. The project involves no expansion of existing uses. The project will have no significant effect on the environment.</p>	NOE	
2001108264	<p>Issuance of Streambed Alteration to Agreement #01-0450, Bear Creek, Humboldt County Fish & Game #1 --Humboldt</p> <p>Department of Fish and Game takes lead agency role pursuant to CEQA Guidelines 15052 (3). The project will install a 48" diameter, 8' deep well casing and a 4" diameter, 40 foot long infiltration feeder adjacent to South Fork Bear Creek, Humboldt County, to supply domestic water to a previously approved private group campground facility (Glantz Conditional Use Permit 98-02). The project will have no significant effect on the environment.</p>	NOE	
2001108265	<p>Protrero Creek Culvert Removal Fish & Game #3 Carmel--Monterey</p> <p>The project consists of removing a culvert and access road. No heavy equipment will be operated in the flowing stream. Issuance of a Streambed Alteration Agreement Number R3-2001-0375 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001108266	<p>San Luis Obispo Creek Road Slope Stabilization Fish & Game #3 --San Luis Obispo</p> <p>Placement of 400 cubic yards of fill in the washed out road slope area and placement of quarter ton to one ton rock slope protection boulders along the toe of the road slope to stabilize the slope. Sediment prevention measures will be implemented to prevent sediment from entering the creek flow. Issuance of Streambed Alteration Agreement Number R3-2001-0589 pursuant to Fish and Game Code Section 1603.</p>	NOE	
2001108267	<p>Culvert Replacement Fish & Game #3 --Monterey</p> <p>The project is located along Highway 1 at PM 45.4 in Big Sur, approximately 100 yards north of the Big Sur Post Office. The project will consist of removing an existing failed culvert and replacing it with a new concrete culvert and adding a rock energy dissipater. The amount of rock to be added to the stream is 5 cubic yards. To accomplish the project, the roadway will be excavated and the old pipe removed and replaced with the new culvert. The unnamed drainage only flows during rainy periods and immediately after rains stop. Issuance of a Streambed Alteration Agreement Number 2001-0580 pursuant to Fish and Game Code Section 1603.</p>	NOE

2001108268	<p>Notice of Exemption for the Sites Reservoir - Salt Lake Fault Geologic Exploration Water Resources, Department of --Colusa</p> <p>The proposed project involves temporary excavation of nine trenches varying in length from 20 yards to a maximum of 300 yards. Depths of trenches and test pits will be to bedrock (estimated two to four feet). Trench width will be approximately three feet. Trenches and test pits will be constructed using a rubber tired backhoe. Topsoil will be stockpiled separately. Trenches will be open for approximately two to three weeks during the day and covered with plywood sheets at night. The excavation sites will be fenced to prevent livestock from entering the excavated area. All CAL OSHA safety guidelines regarding trench safety will be adhered to. After two to three weeks of geologic investigations the trenches will be refilled and compacted using a rubber tired backhoe. The stockpiled topsoil will be dressed over the backfilled trenches. Fences and plywood covers will be removed and the surface elevation restored to pre-excavation levels. These geologic investigations will take place from October to December, 2001.</p>	NOE

	been poorly maintained and subject to annual weed removal for fire protection. State Route 125 abuts the site and a planned eastbound connection to State Highway 52 abuts the site on the north. The property to the north has recently been cleared of multi-family dwelling units to make way for freeway construction.		
2001101082	Fahrens Creek Merced, City of Merced--Merced An approximate 273 acre area located northwest of the intersection of R Street and Yosemite Avenue, northwest of and adjacent to the City of Merced. About 136 acres are proposed for various residential densities, involving an estimated 920 single family dwellings and 355 higher density units, 7.4 acres of neighborhood commercial (C-N), 7.4 acres of commercial office (C-O), approximately 30 acres of proposed parks and open space, and 57 plus acres of business park. The residential, commercial, and office portions are designated in conformity with the City's General Plan Village Concept, involving a high-density residential/commercial Village Core and lower density surrounding residential, within a grid of major roads (arterials) designed to attract and carry inter-village trips.	Neg	11/12/2001
2001101083	Judson-California Elementary School Redlands Unified School District Redlands--San Bernardino The project proposed for development is a new elementary school consisting of classrooms, a media center, administration facilities, support facilities, and turfed fields and asphalt play areas. The project will also include special education and therapy facilities, in coordination with the San Bernardino County Superintendent of Schools. The proposed Elementary School will serve 500-650 students in grades K-5. The school buildings will consist of a total of 52,682 square feet consisting of a school campus of 37,982 square feet, County Special Education classrooms of 4,440 square feet, future portable classrooms of 5,760 square feet, and California Children's Therapy Unit of 4,500 square feet. The elementary school will employ 30 staff members. Hours of operation are tentatively scheduled to be 8:00 am to 2:00 pm. However, occasional evening programs are anticipated.	Neg	11/12/2001
2001102066	Cellular Installation, East Highway 17 Santa Cruz County Scotts Valley--Santa Cruz Proposal for a time extension for Commercial Development Permit #94-0777 to construct an 80 foot high monopole to support cellular panel antennas, five equipment buildings and an emergency generator; a Minor Variation to allow the use of a different point of access to APN 095-241-04 over APN 095-271-01; and a Preliminary Grading Approval to recognize completed grading of approximately 787 cubic yards of cut and 593 cubic yards of fill to improve the existing access point, excavation of 2,690 cubic yards from the borrow pit for road improvements and construction of a cribwall. Property is located on the east side of Highway 17, about 500 feet south from Sugarloaf Road in the Summit planning area.	Neg	11/12/2001

2001102070	NEES Centrifuge Support Building (Tiered from SCH #1994022005) University of California Davis--Yolo UC Davis proposes to construct and operate an approximately 4,700 gross square foot building to support research activities at the Network for Earthquake Engineering Simulation (NEES) Centrifuge site. The building would be located adjacent to the existing centrifuge facility near the hydraulics laboratory west of Brooks Road on the west campus. The proposed building would include space for offices, a conference and computer area, and space for preparing testing materials. The building would be constructed on a concrete foundation with a steel frame structure, metal panel sheathing, and a metal panel roof. Project elements surrounding the building would include a new gravel area for employee parking, a new gravel entrance drive, and a new septic system. Centrifuge modeling is a tool for studying the effects of ground shaking on critical structures. The centrifuge applies an increased gravitational acceleration to physical models in order to produce identical self-weight stresses in the models and prototypes. Centrifuge model testing provides data to improve the understanding of soil deformation and failure and provides benchmarks to verify numerical models.	Neg	11/12/2001

	been disturbed by previous development. Services (electrical, water, and telephone) will hook up from existing facilities; trenching will be limited to previously disturbed areas. Work will be completed during the off season, with campground closed as necessary for public safety; impact to visitors should be minimal. Site grading will only occur from October 15 to April 15 (rainy season) to minimize dust (unless soil measure content allows).		
2001108281	Entry Road Repair Parks and Recreation, Department of --Mendocino Repair entrance road at Russian Gulch State Park to protect visitor safety, protect drainage, and improve park experience. Repave existing entrance road from ranger station to campground with asphalt concrete and pavement reinforcement fabric, within existing footprint. Install curb on outboard side of road, raise manholes to new grade, and restripe road and recreation hall parking lot. Repair existing retaining wall, replacing horizontal timbers and installing new backfill material as necessary. Remove, repair/reconstruct, and reinstall existing guardrail; new post holes will be adjacent to, but offset from, existing footprint for stability. Old post holes will be filled with compacted granular material. Install 50 feet of additional guardrail to provide needed level of safety. Barriers will be in place during all excavation, to prevent construction materials or soil from entering creek. All construction staging will be restricted to existing paved surfaces.	NOE	
2001108282	Clean Out 2 Ponds Near Baker Creek Fish & Game #7 --Inyo Perform maintenance activities to facilitate stream flow within the two (2) ponds on Baker Creek by cleaning out sediment and debris that have accumulated in these man-made ponds.	NOE

2001108285	Wine Creek Erosion Control Fish & Game #3 Healdsburg--Sonoma The project is required to reduce the potential for delivery of sediment to Wine Creek through the upgrading of several road segments on the property and the improvement of stream crossings that had been improperly installed at an earlier date. Issuance of Streambed Alteration Agreement Number R3-2001-0512 pursuant to Fish and Game Code Section 1601.	NOE	
2001108286	Emergency Water Line Repairs Fish & Game #3 --Santa Clara The project includes repair of a raw water line between Lake Elsmann and the Lexington Reservoir. The pipe will be repaired by welding patches or fitting small sections of pipe. Issuance of a Streambed Alteration Agreement Number R3-2001-0759 pursuant to Fish and Game Code Section 1603.	NOE	
2001108287	Debris Rack Installation and Culvert Repair/Replacement Fish & Game #3 --Monterey The proposed project is located along Highway 1 in Monterey County between PM 57.2 and 63.6. The proposed work will occur at three separate locations on three separate streams. The first site is along Doud Creek at PM 63.6 and the work involves the placement of a debris rack at the intake of the culvert. The rack will be composed of corrosion resistant material and will be bolted to the face of the existing headwall. Only a small amount of vegetation, primarily horsetail, will be disturbed. The second site is a seasonal drainage that crosses Highway 1 south of Hurricane Point. The existing culvert will be abandoned and a new headwall constructed with the flows collected at this headwall diverted to an existing HDPE culvert to the third site of this proposed work. The reason for the diversion is to address a severe erosion problem that currently exists at this site. Site number three is approximately 110 meters south of the second site and is located on a different seasonal drainage. A new headwall will also be constructed at this site with the HDPE culvert from site two being tied into this headwall and the flows from both drainages being discharged at this point. Issuance of a Streambed Alteration Agreement Number 2001-0579 pursuant to Fish and Game Code Section 1603.	NOE

2000091079	Texaco Hollister Ranch Pipeline Abandonment Project Santa Barbara County Santa Barbara--Santa Barbara The project is the abandonment of pipelines in a corridor approximately seven miles long. The corridor starts at the Gaviota State Park and runs west through the Hollister Ranch to Augustin Point. The pipelines run parallel to shore and are approximately one-quarter mile from the shoreline. The pipeline crosses 11 creeks and a number of ravines. There are a total of three pipelines in the corridor, which include one 8 inch, one 6 inch and one 2.5-inch pipeline. The 2.5-inch pipeline runs approximately two miles to a pig receiver at Alegria Creek. The 8 inch and 6 inch pipelines run the entire seven miles. The pipelines are buried greater than three feet in depth along the entire corridor, except for those locations where they are exposed due to erosion or by design (pipelines spanning ravines on pipe supports). The pipelines are buried at various depths below the creek beds. There are a total of 38 locations along the pipeline corridor where work to abandon pipelines would be conducted. A number of different work procedures would be conducted at each site.	EIR	11/15/2001

	Improvement Program as well as other transportation programming efforts. The RTP identifies the region's transportation needs and issues, sets forth an action plan of projects, determines actions and programs to address the needs, and documents the financial resources needed to implement the Plan. The RTP establishes a clear vision of Santa Cruz County's regional transportation goals, policies, objectives, and strategies. The action element of the RTP includes all the major physical transportation planning projects being considered by the various agencies within the County. Such projects include road widenings and extensions, bicycle trails and paths, rail-related projects, transit-oriented projects, and other infrastructure related to transportation activities.		
2001052075	Stanley Drive Planned Development (EIAQ-3527) Placer County Planning Department --Placer Creation of a 17-lot planned development on approximately 37 acres. Approximately 2.7 acres for the creation of a viable park for the CVCSO. Approximately 12.6 acres will be open space. Proposal includes the property to be rezoned from F-4.6 to RS-AG-B-100 to be consistent with the adjacent parcels to the east and west.	NOD	
2001061091	Huguley Minor Residential Subdivision San Diego County, Department of Planning and Land Use --San Diego The project is a proposal for a minor subdivision of 1.88 acres for single-family residential development. The lot split will result in two parcels measuring 0.53 acres and 1.14 acres (net). An existing house will remain on Parcel 2 and one additional dwelling unit is proposed on Parcel 1. Access to the project site will be through Valencia Lane, an improved private road off of Avocado Street. The Helix water district will provide water services and Spring Valley Sanitation will provide sewer service to the lots.	NOD	
2001071063	Morgan Minor Residential Subdivision San Diego County, Department of Planning and Land Use --San Diego The project is a proposal for a minor residential subdivision of 3.1 acres into two single-family residential lots. The existing single lot is a result of a boundary adjustment filed January 21, 2000, which combined two lots previously approved by TPM 19529 on January 5, 1993. An existing single family-residence will remain on Parcel 2 and one additional dwelling unit is proposed. The lots will receive imported water services from the Otay Water District and both lots will be on septic. Access to the project site is through Proctor Valley Road, an improved private road.	NOD	
2001099041	Metcalf Energy Center Energy Commission San Jose--Santa Clara Construct a 600-megawatt natural-gas-fired combined cycle power plant. This portion of the project activities includes the connection of a 240-foot-long transmission line across Fisher Creek, cleanup and enhancement of the Fisher Creek riparian corridor, and Tulare Hill Ecological Preserve Cleanup, Preparation and Enhancement. SAA#R3-2001-0690.	NOD

2001108309	Knoxville Creek Watershed Restoration Fish & Game #3 Napa--Napa California Department of Fish and Game (DFG), University of California Davis (UCD), and Homestake Mining Company are implementing a Tamarisk and Pepper-weed eradication plan for 6 miles of the upper Elicura Creek and Knoxville Creek watershed. The objective of the project is to restore the riparian habitat with native vegetation. To accomplish the non-native vegetation eradication plan, there will be four major phases. Phase one will identify, in the uppermost regions, areas in which Tamarisk and Pepper-weed infestation occur. Phase two will consist of DFG coordinating with California Department of Forestry (CDF) hand crews to cut Tamarisk with saws, treat cut stumps with herbicide, and then stack cut materials in piles away from creek channel. Phase three will consist of DFG coordinating with CDF hand crews to collect on site native willow and wild grape cuttings. The cuttings will be treated with root one and planted in the drainages to create vegetation layers to armor stream banks from erosion. Native elderberry will also be planted along upland areas where Tamarisk had been removed. Phase four will be to repeat phases one, two and three over the following three years. Issuance of a Streambed Alteration Agreement Number R3-2001-0725 pursuant to Fish and Game Code Section 1601.	NOE	
2001108310	Culvert Replacement Fish & Game #3 --Santa Clara The project consists of replacing and upgrading an existing culvert and construction of a headwall at both ends of the culvert. Issuance of a Streambed Alteration Agreement Number R3-2001-0329 pursuant to Fish and Game Code Section 1601.	NOE	
2001108311	Sunol Water Line Repair Fish & Game #3 --Alameda The operator proposes to install clean river rock under and around a 12-inch water line in Arroyo de la Laguna in Sunol, Alameda County, Assessor's Parcel Numbers 96-376 and 96-155. The sole water line for the City of Sunol is encased in concrete, which was originally put below grade, but has degraded over the last several years. The concrete casing is exposed and has been undercut by approximately three feet of Arroyo de la Laguna. Approximately 50 cubic yards of clean 12-inch creek cobble will be transported from the staging area, by means of a plastic pipe shoot, and will be placed by hand to fill the existing void created by the undercutting. Filter fabric shall be placed between layers of rock to help promote sedimentation and aggradation in front of the concrete encasement. Issuance of a Streambed Alteration Agreement Number R3-2001-0810 pursuant to Fish and Game Code Section 1601.	NOE
